## IN THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application:

1. - 15. (Canceled)

16. (Currently Amended) A method of infusing a fluid into a body of a user, the method comprising:

obtaining a current blood glucose concentration of the user;

generating a controller input based on the current blood glucose concentration;

generating commands by a proportional plus, integral plus, derivative (PID) controller from the controller input using at least one preset controller gain, wherein the PID controller is a bilinear PID controller wherein a proportional component and a derivative component of the PID controller may be combined to represent a first phase insulin response, and an integral component of the PID controller represents a second phase insulin response; and

infusing the fluid based on the commands from the PID controller; wherein the bilinear PID controller accurately estimates a hypoglycemic glucose excursion.

17. - 31. (Canceled)

32. (Currently Amended) A system for infusing a fluid into a body of a user, the system comprising:

means for obtaining a current blood glucose concentration of the user;

means for generating a controller input based on the current blood glucose concentration;

means for generating commands by a proportional plus, integral plus, derivative (PID)

controller from the controller input using at least one preset controller gain, wherein the PID

controller is a bilinear PID controller wherein a proportional component and a derivative

component of the PID controller may be combined to represent a first phase insulin response,

and an integral component of the PID controller represents a second phase insulin response; and

means for infusing the fluid based on the commands from the PID controller;

wherein the bilinear PID controller accurately estimates a hypoglycemic glucose

excursion.

## 33. - 34. (Canceled)

- 35. (New) The method of infusing a fluid into a body of a user in accordance with claim 16, wherein the PID controller is a bilinear PID controller.
- 36. (New) The system for infusing a fluid into a body of a user in accordance with claim 32, wherein the PID controller is a bilinear PID controller.
